

Information about local traffic and weather should be made available to anyone that wants to broadcast it. This is ridiculous. I choose satellite radio because all of the local stations here in Nashville are goofy and annoying, with too many commercials.

I want a traffic and weather channel on my satellite radio for the Nashville area. Don't let big business override the wishes of the people!!!!!!!!!!!!!!

They have money to pay for lobbyist and to line the pockets of the fat cat legislators. This is information that should be available to anyone anywhere, It's a safety issue as well. I only listen to satellite radio, and will never go back to regular radio. I have a right to know about potential traffic and weather danger in my area.
